Pursuant to California Government Code 8589.45, the owner or person offering the property for rent shall disclose to the tenant that the property is located in a special flood hazard area or an area of potential flooding, if the owner: a) has received written notice from any public agency stating that the property is located in a special flood hazard area or an area of potential flooding, b) the property is located in an area in which the owner's mortgage holder requires the owner to carry flood insurance, and c) the owner currently carries flood insurance. Furthermore, the owner is not required to provide additional information concerning the flood hazards to the property and that the information provided pursuant to this section is deemed adequate to inform the tenant.

Disclosure Source reviews specific public records to determine whether the property is located in any of the two statutorily defined flood hazard zones described below.

SPECIAL FLOOD HAZARD AREA

Pursuant to federal law, the Federal Emergency Management Agency (FEMA) is required to identify and designate areas that are subject to flooding as part of the National Flood Insurance Program. A "Special Flood Hazard Area" (any type Zone "A" or "V") as determined by FEMA is an area where all or a portion of the property has a 1% chance each year of being inundated by flood waters. If a property is located in a Special Flood Hazard Area, the cost and availability of flood insurance may be affected. Properties not located in a Special Flood Hazard Area are not relieved from the possibility of sustaining flood damage. A few areas are not covered by official Flood Insurance Rate Maps. If information is not available, Disclosure Source recommends that the tenant contact the local jurisdiction's planning and building department to determine the potential for flooding at the subject Property.

Source(s) of data: Title 42 United States Code Section 4101

Based on a review of the Flood Insurance Rate Map(s) issued by FEMA, the subject Property:

DAM INUNDATION / AREA OF POTENTIAL FLOODING

The State of California Office of Emergency Services is required to review, approve and maintain copies of the maps that have been prepared and submitted to them by local governmental organizations, utilities or other owners of any dam in the state. The maps delineate areas of potential inundation and flooding that could result from a sudden, partial or total dam failure. Dams in many parts of the world have failed during significant earthquakes, causing flooding of those areas in the pathway of the released water. Legislation also requires, appropriate public safety agencies of any city, county, or territory of which is located in such an area, to adopt/implement adequate emergency procedures for the evacuation and control of populated areas near/below such dams.

Source(s) of data: Government Code Section 8589.5

Based on a review of the official map(s) available through the State of California, Office of Emergency Services, the subject Property:

IS IS NOT located in a Dam Inundation Zone Do not know and information not available

LOCAL/SUPPLEMENTAL FLOOD HAZARD ZONE

Disclosure Source has obtained maps that are both official and publicly available from city, county, and state sources that supplement the statutory flood hazard information. Local/Supplemental flood zones include information in addition to, or different from, the areas mapped on Flood Insurance Rate Maps by the Federal Emergency Management Agency or Dam Inundation zones as reported by the California State Office of Emergency Services. These can include tsunamis, seiches (inland lake tsunamis), runoff hazards, historical flood data and additional dike failure hazards.

Disclosure Source has only reviewed maps that are available in a usable format and at an appropriate scale to delineate where hazards may exist on a single parcel basis. The foregoing statement should be considered a part of the Disclaimers of this Disclosure Report and those Disclaimers apply to this Statement. Please refer to them for further information.

If a portion or all of the property is located within one of these hazard areas, Disclosure Source recommends that the owner and tenant contact their insurance company to ascertain the availability and cost of flood insurance.

Based on the maps obtained, the subject Property:

IS IS NOT located in a supplemental Flood Hazard Zone Do not know OR information is not available

ADDITIONAL INFORMATION:

The subject property is located in an area of potential flooding that could be the result of an instantaneous dam failure, as designated by the City or County. These zones are areas where the property could be subject to flooding and/or damages associated with flash-flooding caused by instantaneous dam failure.

FLOOD INSURANCE NOTICE

Floods can have a devastating effect on communities, causing loss of life, property damage, and loss of income, and can have an adverse effect on government functioning. As such, the federal government has designed measures that are intended to aid in disaster assistance by encouraging insurance coverage for those properties in flood disaster areas.

The owner's insurance does not cover the loss of the tenant's personal possessions and it is recommended that the tenant consider purchasing renter's insurance and flood insurance to insure his or her possessions from loss due to fire, flood, or other risks of loss.

Pursuant to Section 8589.45 of the California Government Code, the owner is not required to provide additional information concerning the flood hazards to the property and that the information provided pursuant to this section is deemed adequate to inform the tenant.
